Launching of EMS, your friendly GRC software

Discover a better way of managing your Governance, Risk and Compliance ("GRC") issues from anywhere in the world!

Come and experience the power of the latest Enterprise Management System ("EMS"), the Web based Integrated GRC Software at an exclusive preview event. The new EMS application Software 2016 4.1 Version has 7 modules i.e. risk management, compliance management, incident management, insurance management, Information Security Management System, internal audit and whistle blowing.

You will be hearing directly from the master developer of the software, Kenny Harris Wong on how the latest version of the EMS software can assist you to improve your organisational efficiency in managing your risk, compliance, incident, insurance, IT security and internal audit processes. Kenny will also provide a live demo on the latest dashboard views and high impact reports available from the EMS software.

You will also have the opportunity to hear and meet organisations who have successfully implemented and benefited from the EMS software application.

The details of the event are provided below and please confirm your attendance early with Fitriyani at +603 21818865 or email fi@axcelasia.com as seats are limited and reservations are on a first come first basis.
